

Woodman

4515 Cyclone Dust Extractor

Features

- 5 mm heavy duty steel fan housing to reduce noise
- Efficient backward inclined centrifugal fan impeller
- High efficiency cyclone body for improved separation
- Fan relief air ducting acoustically lined for quieter operation
- Final filter system comprised of pleated filter canisters constructed from Anti-static PTFE impregnated, spun-bonded, non-woven polyester
- The filter system ensures separation of fine particles to under two microns
- Left and right hand inlet varieties available

Specifications

- Fan Capacity: 2600 litres per second at a resistance of 2500 pascals
- Drum capacity: 200 Litre and 1000 litre
- Sound rating: 73 dBa
- Filter Media: PTFE Antistatic
- Filter cleaning: Automatic
- Motor: 11KW, 3PH

Optional Accessories

- Poly bags (pkt 10) or roll 50
- Hose Clamps
- Flexible Ducting
- Spiral Ducting
