

# Woodman 600 x 900mm CNC Machine

## The Woodman 600x900mm CNC Machine

Built to Gregory Machinery specification and designed for use in domestic, educational and light industrial applications. Built by one of the worlds leading specialist manufacturers of CNC machines, using componentry and systems usually only found in larger, heavier duty machines. With its compact footprint and (more than) ample power, this fully featured unit is suitable for advertising, custom label industry, woodworking, model making, and perfect for podiatry orthotic fabrication.

## Optional Accessories

Dust extraction Guard and Dust extraction units

Woodman CNC Stand (as pictured - optional extra)

## Features

900mm x 600mm process area with 150mm Z axis travel

Includes UCANCAM - Cad-Cam software

Colour screen DSP Handheld controller with G-Code preview

Compatible with most G-code based 2D-3D design packages

Spindle: 2.2kW water cooled and variable speed (15A required)

Spindle: 5,000-24,000RPM

Heavy cast iron and precision machined aluminium construction

Ball screw on all axis with heavy duty steppers

Small compact water pump included

T-Slot table with clamps with MDF Spoil boards

Footprint: 1500mmL x 1000mmW x 1100mmH (not including stand)

Weight: 220kg
