

SAWGEAR® FEATURES

Portable and Job Site Rugged: Sets up in minutes and built rugged enough for job site use.

Accurate: Plus or minus 1/128" repeatable accuracy for dead-on cuts every time.

Easy to Use: Takes just minutes to set up and learn.

Adaptable: Fits your miter saw and stand either to the right or left of the saw.

Theft Resistant: Anti-theft system makes unit worthless to a thief.

Stores Cut Lists: Ten lists of up to 10 cut dimensions each; great when working on identical units.

Miter System: Makes casing windows and doors a snap.

Safety: Anti-pinch system helps prevent injuries.

Speed: 125 ft/min. You won't be waiting to make a cut.

Warranty: Best-in-class 2-year limited warranty.

Works the Way You Do: Enter feet, inches, fractions or feet, inches, and decimal fractions, or switch to metric mode.

Size: Available in 8-foot and 12-foot working lengths.

Voltage: 110 VAC.

Ideally Suited For:

- Framing
- Forming
- Finish Carpentry
- Cabinetry
- Installation
- Siding
- Trim
- Tube and Pipe Cutting
- Extrusion Cutting

PUT 30% MORE TIME ON YOUR CLOCK

SAWGEAR® IS YOUR COMPETITIVE ADVANTAGE

With thinning margins and heavy competition for every bid, being good at what you do is no longer enough — you need a competitive advantage. Something that will help you complete jobs ahead of schedule, something that will improve accuracy and overall job quality while reducing waste and rework. You need SawGear.

**DON'T MEASURE
DON'T MARK
JUST CUT**

SawGear streamlines the entire building process from framing to finish with automatic length measuring for your saw. SawGear is accurate to plus or minus 1/128", is job site rugged, and is easy to use: Simply enter a dimension on the keypad, SawGear will move, then slap your material against the stop and make your cut.

To see how something so simple can have such a big impact on a more profitable and sustainable future, contact SawGear at 503.914.4400 or visit us online at www.sawgear.com.

Keypad: The interface is simple and intuitive, allowing anyone to be a pro in just minutes.

Powerhead: The portable powerhead quickly detaches and can be used with other Measuring Bars. The drive motor and electronics are completely enclosed, protecting them from the elements.

Measuring Bar: Made from anodized aluminum, the measuring bar is job site rugged and available in 8' and 12' lengths.

Brackets: Universal brackets are designed to fit most saw stands either to the right or left of the saw.

Carriage/Flip Stop: The flip stop completely flips up and out of the way. The stop is adjustable and can reach all the way to the blade.
