

Bramley Heavy Duty P-B12TE Electric Hydraulic Pipe Bender

Features

Light weight aluminium alloy formers with large angle of arc to support pipe during bending—resulting in superior finish

Cross section of formers is of 'elliptical' form to minimise flattening

Hydraulic ram is easily removed from frame & converts to a 12 ton jack

Complete with six formers, two bobbins (support rollers) & pins

Solid frame fabrication eliminates flexing during bend operation

Specifications

Radius of bend 1/2": 75mm

Radius of bend 3/4": 105mm

Radius of bend 1": 140mm

Radius of bend 1 1/4": 175mm

Radius of bend: 1: 1/2":

Radius of bend: 2": 240mm
