

Laguna

## C Flux Cyclone

# LAGUNA

### Specifications

Motor HP: 3 HP / Phase: 1 and 3

Voltage: 240V & 415V

RPM: 2850

Radio Frequency Remote switch – Black Box

Hand Held Remote Control: High Frequency

Nominal CFM: 2340

Real CFM: 1350

Impeller/Fan Size: 15.5

Inlet Diameters: 8" by 4" x 3 Ports

Drum Capacity: 46 Gal

Octagon drum: Metal Drum Insert

Drum collection bag (Dia. x L): Plastic bag (610 x 950mmL)

Canister Filter type: 1 Micron

Filtration efficiency: 0.2-2micron @ 99.97%

Max Static Pressure (inches of water): 11.2

Canister filter lower dust collection: Plastic bag (400 x 600mmL)

Wheels: (4x) 4" Flat Caster

Decibel Reading: 88 d B(A) (@9.8ft)

Machine weight: 140kgs

Assembled Dimensions (L x W x H): 1178x690x2025mm

### Features

The c|flux comes standard with a 1 micron canister providing filtration of 99.7% of particles 1 micron or larger & features 109 sq/ft. of polyester spun bond pleated filter to ensure maximum airflow. 270° manual clean comes standard.

The c|flux series can be equipped with an optional auto clean kit either at time of purchase or as an add-on later.

The auto clean kit includes a smart sensor that detects a drop in air pressure indicating the filter is getting clogged and automatically activates the cleaning procedure.

Ingenious lift system quickly moves the drum off the floor and seals against the drum lid, avoiding the need for a flex hose.

This design allows for much better portability as you are not forcing 4 wheels into the floor while pushing the unit.
