

Woodman

WOODMAN

DE1000 Down Draft

Features

These tables are popular with small to medium size shops for various sanding operations

The downdraft table provides a higher level of safety and convenience by collecting dust at the source

Specially designed for heavy and finish sanding

Remove dust and particles from the operating area

Industrial strength steel cabinet with three foldable dust curtains help to contain the fine dust particles from escaping the work centre

Steel top with rubber grommets to hold & protect working piece

Low noise, use in conjunction with industrial high pressure dust collectors when using hand tools
